

Module	Workflow	Steps	Comments	Test Status
1. Procurement	1.1 - Supplier Advance workflow	Create draft PO, get approval for the draft PO, share the draft PO with Supplier - Supplier share the PFI for the draft PO Complete the PO with Payment Terms/Delivery terms and enter PFI details, and send for approval. Share the approved PO with Supplier To do the advance payment, Go to Finance > Expenses > Supplier Advance , Select Supplier, select PO, Enter the advance amount in base currency - LYD (Ex. 50% of total PFI value) Dr - Advance to Supplier, Cr - Cash, Save and Complete, check the JE to confirm the auto entry Go to Inventory > Supplier Fulfillment > GRN . Do the GRNs (there can be several shipping invoices related to the PO/PFI), check the JE to confirm the auto entries After all GRNs complete, time to do the balance payment. Go to Finance > Vendor Invoices , Select Supplier, Select PO, from LINKED GRNs, select all the GRNs line by line (use '4 New Row' button), Save and Complete. check the JE to confirm the two auto entries: 'Vendor invoice' and 'Apply supplier advance' Go to Expenses > Invoice settlement > select supplier , from INVOICE SETTLEMENT select invoice (VI number) - notice only the balance amount will be displayed Dr - Accounts Payable, Cr - Cash, Save and complete. check the General Ledger, Accounts Payable balance should be zero		
	1.2 - Balance Payment workflow	Create draft PO, get approval for the draft PO (both internally and with Supplier), share the completed/confirmed PO with Supplier Go to Inventory > Supplier Fulfillment > GRN . Do the GRNs (there can be several shipping invoices related to the PO), Check the JE to confirm the auto entries After all shipments delivered, vendor will notify to do the payment against the invoice shared. First you need to enter the invoice into the system Go to Finance > Vendor Invoices , Select Supplier, Select PO, from LINKED GRNs, select all the GRNs line by line (use '4 New Row' button), Save and Complete. check the JE to confirm the 'Vendor invoice' entry. Time to do the actual payment Go to Expenses > Invoice settlement > select supplier , from INVOICE SETTLEMENT select invoice (VI number) - notice the total amount will be displayed Dr - Accounts Payable, Cr - Cash, Save and complete. Check the JE for Payment Voucher auto entry, check the General Ledger, Accounts Payable balance should be zero Go to Inventory > Supplier Fulfillment > Create GRN [actual arrival qty 20, system GRN qty 200]. So need to do a Stock Adjustment (SA) Go to Inventory > Stock Reconciliation . Select Storage Location. Toggle ON for 'Is this for GRN ...' Search for the SKU/SKUs that needs amendment, select GRN number from dropdown, reduce STOCK IN HAND to 20 (Adjustment changes to a minus value) Save and Complete. Check the inventory to confirm the correction. Check the GL Note: We recommend to use a single Reconciliation Report for a single GRN correction		
	1.3 - Post payment workflow	Go to Inventory > Supplier Fulfillment > Create GRN [actual arrival qty 800, system GRN qty 80]. So need to GRN the remaining qty again Go to Inventory > Supplier Fulfillment > Create GRN [qty 720] Save and Complete. Check the inventory to confirm the correction. Check the GL Scenario: GRN entered for more. VI created. Trying to reduce the Qty from GRN Reconciliation > Block the SA Create GRN for more than actually arrived [actual arrival qty 20, system GRN qty 200] Create vendor invoice VI for the GRN Create Stock Adjustment (SA) using GRN Reconciliation Report (toggle ON) to correct the mistake from 200 to 20, user is blocked from creating SA since GRN is linked with VI Inform VI creator to Revoke the VI Do the correction in Pending SA, Save and Complete - check Inventory for stocks correction Create a new vendor invoice VI for amount matching with qty 20 (manually enter the amount for qty 20) - get it from Finance > GL > click on 'GRN (Suspense)' > search for the Stock Recon no Go to Expense > New Voucher > Invoice Settlement , create a Payment Voucher PV for amended VI - correct payment made. Check the GL Go to Sales > Sales Invoices . Create SI for LYD100, complete it (no payment). Check JE (one entry: Dr AR, Cr Sales, inventory/COGS) Now customer returns LYD50 worth of goods. Go to Inventory > Returns Management . Create SRN linked to that SI, return LYD50 worth, complete SRN. Check JE (one entry: Dr Sales Returns, Cr AR, inventory/COGS). Now, customer may ask for a refund worth LYD50 Go to Finance > Refund Vouchers . Try Refund Voucher for \$50 from that SRN (Dr AR, Cr Cash). Expected: Refund blocked (no cash to pay out so CREDIT SOURCE will show nothing). Apply Credits: nothing to apply (already auto-applied) Go to Finance > Customer Outstanding and check Customer Outstanding: Credit Applied 50, Balance Due 50 SI LYD100, complete. Customer only pays partially, LYD10 To register the payment, go to Finance > Income Select Customer , Select Invoice from INVOICE SETTLEMENT, Dr Cash Cr AR, Save and Complete. Income Payment Receipt LYD10 allocated to SI Customer returns 50 with of goods. SRN LYD50 return, complete Try Refund Voucher LYD50 - Expected: Refund LYD50: blocked Open Apply Credits — see if SRN appears: Expected: no open SRN credit Go to Finance > Customer Outstanding , Balance Due 40 Correct outcome: customer keeps LYD50 of goods, paid LYD10, owes LYD40 — no cash refund allowed		
2. Inventory	2.1 - Goods receiving workflow - entering more than actual received	Go to Inventory > Supplier Fulfillment > Create GRN [actual arrival qty 20, system GRN qty 200]. So need to do a Stock Adjustment (SA) Go to Inventory > Stock Reconciliation . Select Storage Location. Toggle ON for 'Is this for GRN ...' Search for the SKU/SKUs that needs amendment, select GRN number from dropdown, reduce STOCK IN HAND to 20 (Adjustment changes to a minus value) Save and Complete. Check the inventory to confirm the correction. Check the GL Note: We recommend to use a single Reconciliation Report for a single GRN correction		
	2.2 - Goods receiving workflow - entering less than actual received	Go to Inventory > Supplier Fulfillment > Create GRN [actual arrival qty 800, system GRN qty 80]. So need to GRN the remaining qty again Go to Inventory > Supplier Fulfillment > Create GRN [qty 720] Save and Complete. Check the inventory to confirm the correction. Check the GL		
	2.3 - Guard flow and recovery path for posted, unpaid Vendor Invoice (VI)	Scenario: GRN entered for more. VI created. Trying to reduce the Qty from GRN Reconciliation > Block the SA Create GRN for more than actually arrived [actual arrival qty 20, system GRN qty 200] Create vendor invoice VI for the GRN Create Stock Adjustment (SA) using GRN Reconciliation Report (toggle ON) to correct the mistake from 200 to 20, user is blocked from creating SA since GRN is linked with VI Inform VI creator to Revoke the VI Do the correction in Pending SA, Save and Complete - check Inventory for stocks correction Create a new vendor invoice VI for amount matching with qty 20 (manually enter the amount for qty 20) - get it from Finance > GL > click on 'GRN (Suspense)' > search for the Stock Recon no Go to Expense > New Voucher > Invoice Settlement , create a Payment Voucher PV for amended VI - correct payment made. Check the GL Go to Sales > Sales Invoices . Create SI for LYD100, complete it (no payment). Check JE (one entry: Dr AR, Cr Sales, inventory/COGS) Now customer returns LYD50 worth of goods. Go to Inventory > Returns Management . Create SRN linked to that SI, return LYD50 worth, complete SRN. Check JE (one entry: Dr Sales Returns, Cr AR, inventory/COGS). Now, customer may ask for a refund worth LYD50 Go to Finance > Refund Vouchers . Try Refund Voucher for \$50 from that SRN (Dr AR, Cr Cash). Expected: Refund blocked (no cash to pay out so CREDIT SOURCE will show nothing). Apply Credits: nothing to apply (already auto-applied) Go to Finance > Customer Outstanding and check Customer Outstanding: Credit Applied 50, Balance Due 50 SI LYD100, complete. Customer only pays partially, LYD10 To register the payment, go to Finance > Income Select Customer , Select Invoice from INVOICE SETTLEMENT, Dr Cash Cr AR, Save and Complete. Income Payment Receipt LYD10 allocated to SI Customer returns 50 with of goods. SRN LYD50 return, complete Try Refund Voucher LYD50 - Expected: Refund LYD50: blocked Open Apply Credits — see if SRN appears: Expected: no open SRN credit Go to Finance > Customer Outstanding , Balance Due 40 Correct outcome: customer keeps LYD50 of goods, paid LYD10, owes LYD40 — no cash refund allowed		
	3.1 — Baseline: unpaid invoice + full return (auto-apply only). Goal: Confirm SRN reduces invoice balance; no cash refund possible.	Go to Sales > Sales Invoices . Create SI for LYD100, complete it (no payment). Check JE (one entry: Dr AR, Cr Sales, inventory/COGS) Now customer returns LYD50 worth of goods. Go to Inventory > Returns Management . Create SRN linked to that SI, return LYD50 worth, complete SRN. Check JE (one entry: Dr Sales Returns, Cr AR, inventory/COGS). Now, customer may ask for a refund worth LYD50 Go to Finance > Refund Vouchers . Try Refund Voucher for \$50 from that SRN (Dr AR, Cr Cash). Expected: Refund blocked (no cash to pay out so CREDIT SOURCE will show nothing). Apply Credits: nothing to apply (already auto-applied) Go to Finance > Customer Outstanding and check Customer Outstanding: Credit Applied 50, Balance Due 50 SI LYD100, complete. Customer only pays partially, LYD10 To register the payment, go to Finance > Income Select Customer , Select Invoice from INVOICE SETTLEMENT, Dr Cash Cr AR, Save and Complete. Income Payment Receipt LYD10 allocated to SI Customer returns 50 with of goods. SRN LYD50 return, complete Try Refund Voucher LYD50 - Expected: Refund LYD50: blocked Open Apply Credits — see if SRN appears: Expected: no open SRN credit Go to Finance > Customer Outstanding , Balance Due 40 Correct outcome: customer keeps LYD50 of goods, paid LYD10, owes LYD40 — no cash refund allowed		
	3.2 - Partial payment + return - Goal: Confirm auto-apply settles invoice; refund still blocked	Go to Finance > Customer Outstanding and check Customer Outstanding: Credit Applied 50, Balance Due 50 SI LYD100, complete. Customer only pays partially, LYD10 To register the payment, go to Finance > Income Select Customer , Select Invoice from INVOICE SETTLEMENT, Dr Cash Cr AR, Save and Complete. Income Payment Receipt LYD10 allocated to SI Customer returns 50 with of goods. SRN LYD50 return, complete Try Refund Voucher LYD50 - Expected: Refund LYD50: blocked Open Apply Credits — see if SRN appears: Expected: no open SRN credit Go to Finance > Customer Outstanding , Balance Due 40 Correct outcome: customer keeps LYD50 of goods, paid LYD10, owes LYD40 — no cash refund allowed		
3. Sales	3.3 — Fully paid invoice + return (cash refund allowed). Goal: Customer paid in full; return creates refundable credit.	SI LYD100, complete Payment Receipt \$100 (fully paid) SRN \$50 return, complete Check SI balance (may be 0 with credit applied or over-settled) Try Refund Voucher \$50 - If balance 0 and SRN has remaining credit: refund up to \$50 allowed. Refund Voucher posts JE (cash out) Create SI LYD100, save and complete (optional: partial pay). Customer returns LYD50 worth of goods and asks for a replacement SRN \$50 return, complete Create New SI: same customer, Toggle 'Return Invoice ON', select the completed SRN, go to inner UI Add replacement lines (= \$50), complete/dispatch Review Customer Outstanding for both SIs Create an Order fulfilling SI (Quote > SO > OF > SI) to a Main Warehouse Complete the SI. Customer pays. Go to Finance > Income > New Receipt . Complete the Receipt to SI. Now customer decides to return some goods back and get a refund. Since goods were dispatched from a Main Warehouse, the SRN shall be created by the WH admin. i.e. for warehouse return the Warehouse Admin has to select the invoice for to make return note on the sales invoice Go to Inventory > Return Management . Select SI, Select the Same warehouse goods issued, Complete the Return To refund the customer, go to Finance > Refund Vouchers , Select Customer, select CREDIT SOURCE SETTLEMENT, Dr AR, Cr Cash, Save and Complete Note: User warehouse access permissions will be applied at the SRN creation level. This will ensure that only the designated Warehouse Admin for the respective warehouse can create a Return Note (SRN) against sales invoice returns associated with that warehouse.		
	3.4 — Replacement (Return Invoice). Goal: SRN + new SI linked as replacement; inventory in/out	SI LYD100, complete Payment Receipt \$100 (fully paid) SRN \$50 return, complete Check SI balance (may be 0 with credit applied or over-settled) Try Refund Voucher \$50 - If balance 0 and SRN has remaining credit: refund up to \$50 allowed. Refund Voucher posts JE (cash out) Create SI LYD100, save and complete (optional: partial pay). Customer returns LYD50 worth of goods and asks for a replacement SRN \$50 return, complete Create New SI: same customer, Toggle 'Return Invoice ON', select the completed SRN, go to inner UI Add replacement lines (= \$50), complete/dispatch Review Customer Outstanding for both SIs Create an Order fulfilling SI (Quote > SO > OF > SI) to a Main Warehouse Complete the SI. Customer pays. Go to Finance > Income > New Receipt . Complete the Receipt to SI. Now customer decides to return some goods back and get a refund. Since goods were dispatched from a Main Warehouse, the SRN shall be created by the WH admin. i.e. for warehouse return the Warehouse Admin has to select the invoice for to make return note on the sales invoice Go to Inventory > Return Management . Select SI, Select the Same warehouse goods issued, Complete the Return To refund the customer, go to Finance > Refund Vouchers , Select Customer, select CREDIT SOURCE SETTLEMENT, Dr AR, Cr Cash, Save and Complete Note: User warehouse access permissions will be applied at the SRN creation level. This will ensure that only the designated Warehouse Admin for the respective warehouse can create a Return Note (SRN) against sales invoice returns associated with that warehouse.		
	3.5 - Customer Return workflow for OF done from a Main Warehouse	SI LYD100, complete Payment Receipt \$100 (fully paid) SRN \$50 return, complete Check SI balance (may be 0 with credit applied or over-settled) Try Refund Voucher \$50 - If balance 0 and SRN has remaining credit: refund up to \$50 allowed. Refund Voucher posts JE (cash out) Create SI LYD100, save and complete (optional: partial pay). Customer returns LYD50 worth of goods and asks for a replacement SRN \$50 return, complete Create New SI: same customer, Toggle 'Return Invoice ON', select the completed SRN, go to inner UI Add replacement lines (= \$50), complete/dispatch Review Customer Outstanding for both SIs Create an Order fulfilling SI (Quote > SO > OF > SI) to a Main Warehouse Complete the SI. Customer pays. Go to Finance > Income > New Receipt . Complete the Receipt to SI. Now customer decides to return some goods back and get a refund. Since goods were dispatched from a Main Warehouse, the SRN shall be created by the WH admin. i.e. for warehouse return the Warehouse Admin has to select the invoice for to make return note on the sales invoice Go to Inventory > Return Management . Select SI, Select the Same warehouse goods issued, Complete the Return To refund the customer, go to Finance > Refund Vouchers , Select Customer, select CREDIT SOURCE SETTLEMENT, Dr AR, Cr Cash, Save and Complete Note: User warehouse access permissions will be applied at the SRN creation level. This will ensure that only the designated Warehouse Admin for the respective warehouse can create a Return Note (SRN) against sales invoice returns associated with that warehouse.		
		SI LYD100, complete Payment Receipt \$100 (fully paid) SRN \$50 return, complete Check SI balance (may be 0 with credit applied or over-settled) Try Refund Voucher \$50 - If balance 0 and SRN has remaining credit: refund up to \$50 allowed. Refund Voucher posts JE (cash out) Create SI LYD100, save and complete (optional: partial pay). Customer returns LYD50 worth of goods and asks for a replacement SRN \$50 return, complete Create New SI: same customer, Toggle 'Return Invoice ON', select the completed SRN, go to inner UI Add replacement lines (= \$50), complete/dispatch Review Customer Outstanding for both SIs Create an Order fulfilling SI (Quote > SO > OF > SI) to a Main Warehouse Complete the SI. Customer pays. Go to Finance > Income > New Receipt . Complete the Receipt to SI. Now customer decides to return some goods back and get a refund. Since goods were dispatched from a Main Warehouse, the SRN shall be created by the WH admin. i.e. for warehouse return the Warehouse Admin has to select the invoice for to make return note on the sales invoice Go to Inventory > Return Management .
